GYNERING®

MAIN ACTIVE INGREDIENTS:

Etonogestrel (0.120 mg) and Ethinylestradiol (0.015 mg).

MAIN BENEFITS:

- Better accomplishment: does not require daily intake.
- Combined hormonal contraceptive low-dose, for intravaginal use, based on etonogestrel and ethinylestradiol.
- Eva Polymer **Gynering®** is a flexible vaginal ring, easy to use and comfortable.
- Developed by Kern Pharma.
- Does not require cold storage.

FORMAT:

1 Box with 1 vaginal ring.

1 Box with 3 vaginal rings.

MARKET POSITIONING:

Contraceptives.

POSOLGY:

Consult technical sheet:

https://cima.aemps.es/cima/dochtml/ft/82755/FT_82755.html

EU CLASSIFICATION:

Medicine.

**INGREDIENTS:**

Each vaginal delivery system (ring) contains 11.7 mg of etonogestrel and 2.7 mg of ethinylestradiol. Also contains ethylene-vinyl acetate copolymer (28% vinyl acetate) and ethylene-vinyl acetate copolymer (9% vinyl acetate) and magnesium stearate.

GESTAGYN® PRECONCEPTION

MAIN ACTIVE INGREDIENTS:

DHA Microalgae, Folic Acid, Iron (Ferginate®), Vitamin A (Betacarotene), Vitamin D3, and , Zinc and other vitamins and minerals.

MAIN BENEFITS:

- **Iron** contributes to normal formation of red blood cells and haemoglobin.
- **Ferginate®** is a ferric saccharate microencapsulated in a matrix that protects it from the acid pH of the stomach. Its release is progressive and its absorption is optimal in the duodenum, avoiding gastrointestinal side effects.
- **Vitamin A** has a role in the process of cell specialisation.
- Supplemental **folic acid** intake increases maternal folate status. Low maternal folate status is a risk factor in the development of neural tube defects in the developing foetus. The beneficial effect is obtained with a supplemental folic acid daily intake of 400 µg for at least one month before and up to three months after conception.^{1,2}
- **Zinc** contributes to normal fertility and reproduction.
- **Vitamin B6** contributes to the regulation of hormonal activity.

FORMAT:

30 capsules.

4 capsules (sample).

MARKET POSITIONING:

Maternity and fertility.

POSODOLOGY:

1 capsule a day.

EU CLASSIFICATION:

Food supplement.

1. The beneficial effect is obtained with a supplemental folic acid daily intake of 400 µg for at least one month before and up to three months after conception.
2. The abnormal development of the fetus is due to multiple risk factors. Changing any of these factors may or may not have a beneficial effect.

INGREDIENTS:

NUTRIENT	MG/CAPSULE	%NRV
DHA (docosahexaenoic acid) microalgae	100 mg	
Vitamin B9 (L-methylfolate)	400 µg	200%
Vitamin A (retinol equivalent)	700 µg	88%
Vitamin B6	1.4 mg	100%
Vitamin B12	2.5 µg	100%
Vitamin D3	20 µg (800 UI)	400%
Vitamin E (alpha-tocopherol equivalent)	12 mg	100%
Iron (Ferginate®)	18 mg	129%
Iodine	150 µg	100%
Selenium	55 µg	100%
Zinc	10 mg	100%

MELAGYN® VAGINAL MOISTURIZER

MAIN ACTIVE INGREDIENTS:

Hyaluronic acid, Centella asiatica, Aloe vera, Glycoproteins, Alpha-gluco-glucooligosaccharides.

MAIN BENEFITS:

- Mucoadhesive moisturizing gel for vulvovaginal dryness.
- Moisturizes and contributes to the recovery of the flexibility and elasticity of the vaginal mucosa.

FORMAT:

Tube 60 g + 21 applicators.

Tube 3 g + 1 applicator.

MARKET POSITIONING:

Intimate care.

POSODOLOGY:

Apply 2.5 g of gel 2 times per week. It can be used daily if necessary.

It can be applied in the vulvo perineal area in case of vulvar dryness.

EU CLASSIFICATION:

Personal care product.

INGREDIENTS:

Aqua, Propylene Glycol, Glycerin, Triethanolamine, Alpha-Glucan Oligosaccharide, Phenoxyethanol, Lactic Acid, Carbomer, Xanthan Gum, Aloe Barbadensis Leaf Juice, Polyacrylic Acid, Centella Asiatica Extract, Tetrasodium Glutamate Diacetate, Chitosan, Ethylhexylglycerin, Lactose, Tocopheryl Acetate, Biosaccharide Gum-1, Sodium Hyaluronate, Whey Protein, Potassium Sorbate, Sodium Benzoate.
